

CODE YOUR FUTURE!

DEVOPS ENGINEER

We are currently looking for an experienced DevOps Engineer, with strong skills and proven experience, who is ready to dive into AVA team, for a full-time engagement, to join our team of passionate IT professionals, here in our Belgrade office. AVA is an award-winning startup company based in Zurich. They have recently launched a novel wearable device that has the potential to significantly increase the quality of life for millions of women. The core of their business is smart algorithms which exactly and reliably predict a woman's fertile days.

AS DEVOPS ENGINEER YOU WILL:

- Configure, run, maintain and improve Ava's production and staging environment
- Collaborate with developers, architects and QA engineers with a focus on configuration and release management
- Contribute to software architecture design with a focus on security, scalability, maintainability, cost and performance
- Develop and implement strategies for reliability improvements, disaster recovery and backups
- Implement an infrastructure for build automation, continuous integration and deployment and contribute to a full toolchain automation throughout Ava's product development process
- Work with a wide range of technologies and tools, such as Python, Java, MySQL, MongoDB, AWS, Jenkins, Bitbucket and Jira
- Ensure operations of various internal tools at Ava and support different teams (certificate and VPN management, user management, etc.)

ESSENTIAL SKILLS AND EXPERIENCE:

- Bachelor's or Master's degree in computer science, electrical engineering or a related field
- +3 years as a DevOps Engineer or in a similar role

- Previous experience with AWS and related services (EC2, S3, RDS, SQS, Lambda, CloudWatch) required, AWS certification preferred
- Good knowledge of software design and architectural patterns
- Excellent knowledge of Unix/Linux, Python and Bash or another scripting languages
- Experience with relational and non-relational databases, ideally MySQL and MongoDB
- Experience with at least 2 of the following services/tools: git, Bitbucket, Jenkins, Maven, Gradle, Jira, Docker/Kubernetes
- Willingness to work flexibly, in an interdisciplinary and international environment, depending on the current project status
- Strong analytical skills and process-oriented work style with a structured, independent approach to work and focus on getting things done
- Strong communication skills, stress-resistant, even in fast-paced and busy situations

BENEFITS:

- High-growth company in which you can find an exciting and trend-setting challenge
- Amazing product to work on
- Compensation plans higher than the market average
- Familial working atmosphere in an open-minded multinational team
- All necessary equipment – up to you to decide what you prefer
- The budget for professional improvement (courses, conferences, books...)
- The budget for the mastery of the English language during the working hours
- Nice, comfy and modern office in Belgrade
- Fully stocked kitchen (tea, coffee, fruits, soft drinks, snacks...)
- Tournaments of table tennis, table soccer, and darts in our office
- Skilled and senior co-workers
- Opportunities to build products that really make a difference
- Opportunities to learn and grow with us

If you are interested in this position and you have all the required qualifications, do not hesitate to send your CV to: hr@holycode.rs.
