

# Junior tester (m/f)

- **Full time; Zagreb office**  
(suitable for students as well)

Imagine you could work on **one of the world's top 5 software solutions for tourist agencies**.

How so? As a **junior tester** who will help our QA team at Lemax make sure that what our customers put in words – our developers put into code. And whose keen eye for details will secure that our software adheres to the highest standards!

Do you believe that **excellence is in the details** – which is why you strongly care about quality and you **set high standards for yourself** no matter what you do? And are you seriously considering **starting your career in QA**?

If yes – you might find this career opportunity interesting.

## What are you going to do?

- Manual testing
- Writing test cases
- Writing automated UI tests
- All other tasks in agreement with your mentor

## Who are we looking for?

A detail-oriented person who has the following skills and interests:

- Most importantly: the desire to learn, grow and develop your career in software quality assurance
- Basic programming skills (Java, C#)
- Basic knowledge of web technologies (HTML, CSS)
- Interest in UI testing frameworks (Selenium)

## What do we offer?

- Working on challenging projects for clients from all over the world – we have 120+ clients on 6 continents
- Experience of working with one complex product – we're developing one of the leading software solutions for tourism industry in the world!
- A stimulating work environment that will challenge you to learn and grow every day – we'll give you a senior mentor to lead you and support your work
- An attractive compensation – we value and appreciate hard work and good results

If you want to join our growing QA team, please send us your CV via the [submission form](#).
