Join us!

We are currently looking for a Senior Front-End Developer to work with us in building rich interactive experiences, essential to making sure the creative vision for an experience works seamlessly.

Responsibilities:

Creating sophisticated interfaces for in-browser applications using JavaScript, HTML and CSS

Qualifications:

- 5+ years experience in similar JS/FE role
- Experience with at least one of the listed frameworks/libraries: AngularJS, ReactJS
- Experience with development of Single Page Applications with Javascript
- Current and detailed knowledge of browser peculiarities and how to work around them
- Experience with responsive/adaptive design

Nice to have but not required:

- Experience with modern UX/UI development principles (WebComponents, ShadowDOM)
- Experience with some of the current modern frameworks
- Experience with mobile development a plus but not required
- Experience with NodeJS
- Experience with ES6/TypeScript
- Experience with build tools such as Gulp/Grunt or Webpack
- Bachelor's degree preferred but not required

Yours benefits:

- Competitive salary
- Friendly atmosphere
- Good work/life balance
- Engaging projects
- Supportive management
- Downtown office location
- Work from home options
- ...and other perks

Deploy is an equal opportunity employer (EEO)
