

Senior Rails Developer

LearnUpon is looking for a Senior Rails Developer to join our team in Belgrade.

LearnUpon is a cloud-based software company headquartered in Dublin, Ireland with offices in Philadelphia, Sydney, and Belgrade. LearnUpon is designed for organizations looking to distribute their courses and track their training quickly and easily at scale.

At LearnUpon we put our customer's experience at the heart of everything we do, we always strive for the best solution (not the easy one), and we commit to producing work that we can be proud of. Our company is a very open, collaborative environment where team and individual accomplishments are celebrated and encouraged. You can be part of a team who supports and guides each other to be our best, and who does their best work in a supportive and fun environment.

Our development team consists of highly talented web developers working in an innovative and dynamic environment in Belgrade.

What will I be doing?

- Architecting and delivering solutions that continue to amaze customers.
- Working alongside a team, shipping features on a rapid release cycle.
- Researching and prototyping newer technologies to constantly evolve the product.
- Reporting directly to CTO and working with our Engineering and QA teams.

What skills do I need?

- Can appreciate technology agnostic solutions for a clear company vision.
- Experience with understanding and implementing Agile-focused best practices.
- 5+ years experience building applications using Rails, Django, Laravel or equivalent framework.
- Experience with a client-side JavaScript framework.
- Extensive experience with relational-databases and query performance.
- Excellent communication skills, team player.

Don't worry if you don't tick every box in order to apply, we're always happy to review applications and take all experience into consideration. We do our best to provide feedback where we can!

Not required but considered a big plus

- Experience with non-relational databases.
- Exposure to Amazon Web Services.
- Previous experience of eLearning technologies.
- Experience with API and payment gateway integrations.
- Previous use of AngularJS or other modern client-side JavaScript framework.
- Experience troubleshooting HTTP and application performance issues.

Why work with us?

- Work in a fun and supportive environment with regular team events.
- Excellent career progression – take LearnUpon where you think it can go.
- Structured learning environment.
- Competitive salary and company ESOP.
- Private health insurance.
- 22 days annual leave.

What is the Hiring Process?

Applicants for the position can expect the following hiring process:

- Qualified applicants will be invited to schedule a 30-minute call.
- Successful candidates will then be invited to two 1-hour technical interviews.
- Finally, candidates will have a short interview with our CTO.
- Successful candidates will be contacted with an offer to join our team.

If you are interested in applying for this role please send us your CV in confidence to jobs@learnupon.com . We look forward to hearing from you!
