

Our client is the leading showing software and market stats service provider for the residential real estate industry. In order to support their growing business, Adecco is searching for responsible, proactive and independent candidates for the following position in Belgrade:

Software Test Engineer

What you'll do:

- ▶ Writing, building, and maintaining automated Selenium test in C# using the Xunit Framework (Experience in Junit or NUnit is fine as well)
- ▶ Developing regression and unit test plans, managing issues/defects, and test execution of web applications

What you'll need:

- ▶ Hands-on experience developing regression and unit test plans, managing issues/defects, and test execution of web applications
- ▶ Hands-on experience with automated testing of the web application
- ▶ Experience with cross-browser system testing
- ▶ Experience with MS SQL Server is desired
- ▶ Some experience with Analysis Services Cube
- ▶ Knowledge of Mobile browser and native apps experience is a plus

Our client offers:

- ▶ Work in a relaxed, fun and stimulating environment
- ▶ Work with skilled colleagues and grow your own skills
- ▶ Be a participant in a rapidly growing company
- ▶ See your work widely used in the real estate industry
- ▶ Make a significant contribution to our client web-based products
