

C# DEVELOPER

You will take part in design, development and testing native applications for Windows devices. The solution makes use of the latest technological advancements, specifically pertaining to video delivery and development of a highly interactive graphical user interface.

Freedom and responsibilities:

- Implementing and automatically testing Windows application according to provided specification
- Communicating, collaborating and coordinating work with other members of Scrum teams (front-end, back-end, QA engineers)
- Documenting your designs and solutions
- Proposing, planning and implementing further improvements to the solution

What we look for:

- At least 2 years of experience in software development
- Professional experience with C# or XML
- Experience with UWP or WPF
- Experience with Xamarin or Silverlight will be considered as a plus
- Experience with Git
- Good verbal communication and good interpersonal skills
- Advanced problem-solving skills
- High proficiency in written and spoken English

What will be considered as a bonus:

- Experience with video streaming and animations
- Knowledge of Appium
- Experience with Photoshop or Zeplin
- Understanding of Unity 3D

What you'll have here:

- Challenging projects and environment with an extremely Agile mindset
- Continuous career growth
- Direct communication with key stakeholders
- Casual but highly professional and dynamic environment
- Modern and cozy offices in Navigator Business Center - Belgrade, Serbia
- Sports, team buildings, conferences, and events
- Work life balance

We are focused on solving challenging creative problems, and making brands with attitude that stand for something valuable. We are looking for smart, ambitious, passionate individuals to join our growing team. If you have what it takes to make a change for the better send us your CV and we will get back to you soon.

Only shortlisted candidates will be contacted.
