

JAVA ENGINEER – VIDEO STREAMING

As a Java Engineer, you will take part in design, development, and testing of a server-side application for the EON platform. The robust and highly scalable solution makes use of the latest technological advancements, specifically pertaining to video processing and delivery.

Freedom and responsibilities:

- Development of robust, scalable, high performance real-time server-side application for ingest, processing, packaging and distribution of video and audio signal.
- Development of real-time monitoring components
- Development of different services that support main server-side application.
- Communicating with the back-end teams
- Proposing, planning and implementing further improvements to the solution
- Improving our CI/CD pipelines and toolsets.

What we look for:

- At least 3 years of experience in software development
- Professional experience with core Java
- Experience with TCP/IP based protocols (HTTP/DNS)
- Experience with garbage collectors will be considered as a plus
- Experience with high-availability systems
- Good verbal communication and good interpersonal skills
- Advanced problem-solving skills
- High proficiency in written and spoken English

What will be considered as a bonus:

- Experience with video streaming and audio/video codecs
- Experience with GC optimizations, off-heap memory manipulation, direct I/O operations
- Experience with network protocols implementation (Multicast, TCP, UDP)

What you'll have here:

- Challenging projects and environment with an extremely Agile mindset
- Continuous career growth
- Direct communication with key stakeholders
- Casual but highly professional and dynamic environment
- Modern and cozy offices in Navigator Business Center - Belgrade, Serbia
- Sports, team buildings, conferences, and events
- Work life balance

We are focused on solving challenging creative problems, and making brands with attitude that stand for something valuable. We are looking for smart, ambitious, passionate individuals to join our growing team. If you have what it takes to make a change for the better send us your CV and we will get back to you soon.

Only shortlisted candidates will be contacted.
