

Our client is looking for innovative, natural leader who still has the ability to write code “like a boss” for the following position in Novi Sad:

Software Development Team Leader

What you'll do:

- ▶ Facilitate technical leadership for the team. This includes pairing, code reviews and facilitating technical designs.
- ▶ Facilitate development best practices. This includes packaging, modularization (think reusability), style and for the coup de grace, TESTING! Help move us to a red, green, refactor, repeat development pattern.
- ▶ Engage with other Team Leads to ensure teams work collaboratively when required.
- ▶ Conduct spike and exploratory work to better understand the shape of features. This information will be used by project managers to position work in the backlog and by the team during estimation sessions.
- ▶ Negotiate with stakeholders
- ▶ Mentor junior developers. Help mold our up and comers into rock stars like yourself.
- ▶ Work directly with Architecture to facilitate design changes and overcome technical limitations
- ▶ You will still get your hands dirty with coding.

What you'll need:

- ▶ 4+ years in professional Java development role
- ▶ Experience providing technical leadership to small teams
- ▶ Broad experience with successful and failed projects
- ▶ Experience with breaking down projects into work units, effectively delegating tasks and tracking status
- ▶ Excellent understanding of Java
- ▶ Excellent understanding of development best practices (you do not even think about writing code before writing a test case first!)
- ▶ Deep architectural understanding of Java web applications and application micro services
- ▶ Good knowledge in some back-end technologies like Spring, Hibernate, JMS, SQL or others
- ▶ Worked with some of the standard front-end technologies like CSS, JavaScript (we use Angular), REST, JSON
- ▶ Knowledge of Open Source libraries, tools and frameworks, e.g. for logging, wiring, testing, and building.
- ▶ Deep knowledge of Linux
- ▶ Familiarity with CI/CD tools
- ▶ Excitement for the latest trends in application design – Interest in learning more about new languages, frameworks and just better ways to work in general
- ▶ Experience with agile software development methodologies like XP and Scrum
