

WE BUILD
DIGITAL HEALTH
SOLUTIONS

We are looking for a .NET DEVELOPER

We are a US based company, headquartered in San Francisco with a development center (Pamet d.o.o.) in Belgrade, Sava Center. With more than 300 tech solutions delivered over the past 15 years our deep expertise in software development allows us to provide one of the best products in the industry.

Project Description

Our client develops, maintains and hosts platform for a large user base of mental health institutions and clinics. The platform is providing excellent service to end users and it managed to evolve through the years with continually improving and adopting new technologies and concepts.

How it works:

Partnership with clients and growing through their success stories and implementations. Publicly recognized by external auditors.

Recognized in the INC 5000 2015 list

Ranked Number 181st Fastest Growing Company in North America on Deloitte's 2015 Technology Fast 500™

Attained 2014 ONC HIT Meaningful Use Stage 2 Certification!

Raises First Round of Institutional Capital from Goldman Sachs

Tech info:

- Technology stack based on Microsoft products
- Advanced usage of almost all enterprise technology features and/or concepts that evolved through the development in the digital era of medical and health services.
- Large ecosystem of solutions and modules including BI, EMR/EHR, Reporting, Billing, Scheduling, Mobile applications (iOS, Android, Windows Mobile), external facing interfaces and APIs, etc.
- Security and reliability as priority number one.
- Using Telerik components to enrich the end-user interface and overall user experience.
- Ever evolving platform with defined upgrade cycles and schedules.

We are looking for a .NET/C# Developer to join us in our Belgrade office and work in our team on different projects for large local and international clients. Your primary responsibilities will be to design and develop .NET/C# applications and to coordinate with the rest of the team working on different layers of the infrastructure. Therefore, a commitment to collaborative problem solving, sophisticated design, and quality product are essential.

Education and experience

- University degree in computer science (or equivalent)

Technology skills

- 3+ years of experience with .NET framework and Microsoft stack
- Excellent knowledge: C#, ASP.NET MVC
- Excellent understanding of IT concepts and software development practices incl. Security
- Experience in working with MS SQL Server and knowledge of SQL
- Experience in JavaScript, jQuery
- Knowledge of common design patterns
- Experience in writing unit tests for .NET
- Experience with Telerik tools is preferable
- Knowledge in ASP.NET Core is preferable
- Proficient understanding of GIT, TFS code version systems (branching strategies, conflict resolving)

Personal skills

- Strong communicator with analytical thinking
- Team player eager to learn and share the knowledge with the team
- Oriented to self-education and skills improvement

Benefits

- Excellent compensation package
- Positive company culture
- Team buildings and all that comes with the territory
- Monday breakfast, Friday lunch and beer
- Continuous training and education program
- Interesting projects with a high focus on quality
- Advancement opportunities based on performance
- Free coffee and subsidized non-alcoholic drinks
- Did we mention the beer?

Interested? Awesome!
