We are looking for a
REACT NATIVE DEVELOPER

We are a US based company, headquartered in San Francisco with a development center (Pamet d.o.o.) in Belgrade, Sava Center. With more than 300 tech solutions delivered over the past 15 years our deep expertise in software development allows us to provide one of the best products in the industry.

Project Description

Our client works with health professionals and breastfeeding experts to help a modern generation of mothers in breastfeeding by creating a modern care relationship with high quality, relevant videos and support tools.

How it works:

1. Sign up

First, a new account is created for the parent by their health professional

2. Personalised Program

A personalised program is then created from a content library of videos and information

3. Support

If the parent is having trouble they can chat to their health professional or volunteer community coach

4. Daily monitoring

To help everyone keep track of their progress the parent completes a daily survey

5. Update

The health professional or coach updates the program depending on the parents changing needs and growth of the baby

Tech info:

Application architecture will be designed using the next-generation lightweight frameworks based on Java. The overall application architecture will consist of the following four deployment units:

- Restful API implemented using Spring Boot as the application backend. The API will be designed and implemented following the best industry practices. The JSON Web Token-based authentication schema will be used to enforce endpoint security. The application will be HIPAA and GDPR compliant.
- 3 mobile apps dedicated to the three user areas (Health Professionals, Coaches and Parents). All applications will be implemented using the React Native framework.

VICERT
Digital Health Solutions

We are looking for a capable React Native developer with strong skills and proven experience who is ready to join our team. Become a part of a strong team with vast experience in software development, and develop your career working in an inspiring environment focused on education, personal growth, and client success.

Education and experience
- University degree in computer science (or equivalent)
- Minimum one year experience with React Native
- Experience with Agile methodologies (SCRUM) and fast-paced startup environments.
- Experience in native iOS and/or Android development, in addition to the React Native, is a plus

Technology skills
- Experience with Redux (Redux Thunk, Saga, or similar middleware).
- Experience in working with JSON-powered APIs.
- Experience in working with Unit test tools like Karma, Chai or Mocha, as well as development tools like Webpack.
- Experience in shipping/deploying mobile apps (App/Play Store)

Personal skills
- Strong communicator with analytical thinking
- Team player eager to learn and share the knowledge with the team
- Oriented to self-education and skills improvement

Benefits
- Excellent compensation package
- Positive company culture
- Team buildings and all that comes with the territory
- Monday breakfast, Friday lunch and beer
- Continuous training and education program
- Interesting projects with a high focus on quality
- Advancement opportunities based on performance
- Free coffee and subsidized non-alcoholic drinks
- Did we mention the beer?

Interested? Awesome!
